Profile Summary

Results-driven CS undergraduate with a strong foundation in software engineering, SDLC, and end-to-end product delivery. Experienced in full-stack web, React Native mobile, backend engineering, and AI-powered automation. Proficient in Agile/Scrum using Jira, ClickUp, Trello, and Notion. Skilled in client communication, requirements gathering, lead generation, and workflow automation via n8n and Vapi.

Experience

Full-Stack Developer

Dec 2024 – Sep 2025

ObsidianX

Remote — MERN · Next.js · Full-Stack Web Development

- Architected UIs in **React.js/Next.js** with SSR and dynamic routing, improving SEO and page load performance across 40+ dashboard pages.
- Designed **RESTful APIs** on **Node.js/Express.js** + **MongoDB Atlas** with **JWT** + **OAuth**, role-based access control, and protected routes.
- Drove **CI/CD pipelines**, **Vercel** deployments, and **Postman** API testing; coordinated Agile sprints via **Jira** and **ClickUp**.

React Native (Expo) Developer & Backend Engineer

Jul 2025 – Sep 2025

ThePrimeCrafters

Remote — Part-time — Mobile & Backend Engineering

- Engineered cross-platform apps using **React Native (Expo)**, delivering full UI-to-backend flows within sprint deadlines, reducing client time-to-market.
- Architected **RESTful APIs** in **Node.js** with **JWT/OAuth** auth and **payment gateway** integration, ensuring secure and scalable SaaS-ready backends.
- Automated workflows using **n8n** and **Vapi**; managed end-to-end client communication from scoping to delivery handoff across the full SDLC.

Freelance Flutter Developer

May – Aug 2025

Fiverr

Remote

- Delivered full-stack projects via **Fiverr** managing full lifecycle — lead generation, proposals, development, and post-launch support.
- Built **n8n** lead generation pipelines and **Vapi** voice automation, scaling client acquisition with tools including Apollo.io, Hunter.io, and PhantomBuster.
